SUBJECT: NORTH Group - Application regarding the safety and quality  
of the COVID-19 modified mRNA vaccine

- the answer, delivered

Dear Sir,  
acting on your petition received via electronic mail regarding the safety and quality  
of the COVID-19 modified mRNA vaccine, we inform you as follows.

The Croatian Agency for Medicines and Medical Products (HALMED) and the European  
Medicines Agency (EMA) continuously investigate the safety and quality of the mRNA vaccine  
against the disease COVID-19 including the possible cause-and-effect relationship between  
the mRNA vaccine and the chronic conditions listed in the petition.

Data on the approval and use of the vaccine are publicly available through the regulatory  
authorities (HALMED, EMA) that have approved the use of the vaccine. For any additional  
evidence that is not publicly available and for more information on how to monitor the safety  
and quality of vaccines and research on the cause-and-effect relationship, please contact the  
regulatory authorities (HALMED, EMA) directly.

With respect,

doc. dr. sc. Marija Bubaš, prim. dr. med.
