

Statsminister Jonas Gahr Støre
Helseminister Jan Christian Vestre

Varsel om stor bekymring til stats- og helseministre i Norden, Baltikum og Storbritannia.

Omfattende forurensning i Covid-19 mRNA-vaksiner, koronavaksiner, med rester av artifielt bakterielt plasmid-DNA (arvemateriale) i australske prøver¹, noe som bekreftes av data for tilsvarende funn i vaksiner fra Frankrike, Tyskland, Canada og USA.²⁻⁵

Rester av bakterielt plasmid-DNA innkapslet i lipid-nanopartikler (LNP) kan skade menneskets DNA, noe som potensielt kan føre til endringer i det menneskelige genomet, kreft og andre svært alvorlige tilstander.

Vi, politikere og kvalifiserte fagpersoner fra mange land er svært bekymret for effektene av Covid-19 mRNA-vaksiner på våre befolkninger og krever en umiddelbar stans i bruken av mRNA-vaksiner. Vi ønsker å rette deres oppmerksomhet mot tre kritiske forhold knyttet til utrulling av mRNA-produkter som har dyptgripende konsekvenser for helsen til innbyggerne i våre nasjoner.

- Covid-19 mRNA-vaksinene ble aldri testet for sin evne til å hindre smitteoverføring⁶. Som følge av dette ble befolkningene villedet og presset av offentlige myndigheter til å ta disse produktene.
- Covid-19 mRNA-vaksiner resulterte i et ekstraordinært høyt antall innmeldte bivirkninger⁷, inkludert mange dødsfall⁸. Reproduerbare analyser av offentlige data⁹⁻¹² viser at det var et hasardspill avhengig av hvilken produksjonserie (batch) en person fikk vaksine fra, og hvilke bivirkninger de risikerte å få.
- Analyser utført av en rekke uavhengige forskere viser at Pfizers og Modernas produkter var kontaminert med vekslende og ekstraordinært høye konsentrasjoner av bakterielt plasmid-DNA.¹⁻⁵

Disse tre punktene reiser spørsmål om kritiske og ukvantifiserbare risikoer for innbyggernes helse. Dette har blitt systematisk unngått og oversett av ansvarlige myndigheter. Vi har derfor følgende oppfordring på vegne av våre innbyggere:

- En umiddelbar stans i bruken av mRNA-vaksiner og tilbaketrekking av produktene.
- En uavhengig og transparent granskning av godkjenningssjessene og bruken av mRNA-produktene.
- Vitenskapelige bevis som dokumenterer at det absolutt ikke er noen risiko for skade på det humane DNA.

For mer detaljert informasjon, vennligst se de vedlagte sammendrag med referanser. Basert på denne informasjonen ber vi om klare svar på følgende spørsmål:

1. Hva skal til for å sette i gang en uavhengig og transparent rettslig granskning av de regulatoriske sjessene som førte til godkjenning av disse produktene?
2. Hva hindrer ministrene i å sette i gang og prioritere forskning på mulige sammenhenger mellom mRNA-vaksinene og kreft, infertilitet eller andre kroniske sykdommer som de synes å være knyttet til?

Med denne vitenskapelig godt dokumenterte trusselen mot menneskehetens nåværende og fremtidige generasjoners helse, ber vi om at dere viser den største respekt for sakens alvorlige omfang og handler i folkets interesse.

Med den største omtanke og respekt,

Jørn Eikemo, lege Sigurd Nes, lege
