

## BREAKING NEWS

### 13<sup>th</sup> January 2025 - NORTH GROUP PRESSES GOVERNMENTS FOR ACTION ON DNA CONTAMINATION AND mRNA VACCINE DAMAGE

Authorities from only four countries (Denmark, Estonia, Latvia and Finland) have responded to the initial letter from the NORTH Group calling for an immediate suspension of COVID-19 modified mRNA vaccines over public safety concerns.

**Today, NORTH members have sent a follow-up letter detailing new scientific evidence including:**

- Data from a peer reviewed publication about the presence of vaccine-derived DNA in the blood of 75 COVID-19 mRNA vaccine recipients.
- A peer reviewed publication verifying alarming levels of DNA in vaccine vials, exceeding the safety limit by up to 470 times, from a research project supervised on U.S. Food & Drug Administration premises.

**Despite wide ranging evidence and international concern surrounding the risks of mRNA vaccines, the European Medicines Agency has paved the way for the European Commission to authorize the first self-amplifying RNA vaccine for COVID-19 in the European Union.**

Growing from an initiative between 10 Nordic and Baltic countries and the UK, NORTH has now expanded to include 20 countries:

**Belgium, Croatia, Czech Republic, Denmark, Estonia, Finland, Greenland, Hungary, Iceland, Ireland, Latvia, Lithuania, Malta, Netherlands, Norway, Portugal, Slovenia, Spain, Sweden, and the United Kingdom.**

The second letter from NORTH has also been sent to heads of state and health ministers in the first instance. With over 700 international signatories of the initial letter, citizens from other European countries are preparing to join NORTH in the coming weeks.

**NORTH calls for:**

- *An immediate halt to the use of modified mRNA vaccines.*
- *An independent and transparent investigation into their approval and use.*
- *Scientific evidence that shows that there is no risk of damage to human DNA.*

Please share as MSM has declined sharing our initial press release due to editorial policy.
