

BREAKING NEWS

20th January 2025 – AUSTRIA AND CANADA JOIN NORTH CALLING FOR AN IMMEDIATE SUSPENSION OF COVID-19 mRNA VACCINES.

Austrian Lawyers Association for Fundamental Rights (Änwälte für Grundrechte) with over 50 members sent the NORTH letter to the Austrian Federal Chancellor on 15th January. This was followed by World Council for Health Canada and Vaccine Choice Canada sending the letter to the Canadian Prime Minister and Members of Canadian Parliament on 19th January.

NORTH was initiated on 25th November 2024, when an international group of politicians and leading medical and other professionals wrote to the heads of state of 10 European countries (Denmark, Estonia, Finland, Greenland, Iceland, Latvia, Lithuania, Norway, Sweden, and the United Kingdom) citing serious health concerns regarding COVID-19 modified mRNA vaccines.

Throughout December 2024, NORTH was joined by Belgium, Croatia, Czech Republic, Hungary, Ireland, Netherlands, Malta, Portugal, and Spain. Slovenia became the 20th country supporting the initiative on January 7th.

NORTH groups sent a follow up letter on 13th January to governments that had not yet replied to the original call in November.

With over 700 international signatories, citizens from other countries are preparing to join NORTH in the coming weeks.

The letter from NORTH states:

- Scientific evidence shows that it was a lottery as to which batch of vaccine a person received and the side effects they experienced, including death.
- COVID-19 vaccines were never tested for their ability to block transmission.
- Modified mRNA vaccines contain variable but alarmingly high levels of residual DNA, which raises extreme concerns about the risks to human health including the potential for genetic damage.

The call has unprecedented international support and demands:

- *An immediate halt to the use of modified mRNA vaccines.*
- *An independent and transparent investigation into their approval and use.*
- *Scientific evidence that shows that there is no risk of damage to human DNA.*

Please share. MSM has declined sharing our pervious press release due to editorial policy.
